

Luxury Surface, Refined by Technology....

Who We Are

Founded in 2003, SABTA is one of the UAE's most trusted suppliers of natural stone, known for premium-quality Marble, Onyx, Granite, Travertine, Limestone, Sandstone, and Slate. With over two decades of experience, we've built a reputation for precision, reliability, and craftsmanship making us a preferred partner for architects, interior designers, and contractors across the Middle East. Recognizing the latest market trends, SABTA has expanded its portfolio to include Engineered Marble, Terrazzo, and Quartz, offering a complete range of natural and engineered stone solutions for every project. We maintain an extensive inventory of 200+ colors in both natural and engineered materials, ensuring clients have unmatched variety and availability.

Comprehensive Capabilities

With all production processes under one roof - from slabs and tiles to custom cut-to-size pieces-SABTA ensures exceptional quality control. We offer a wide range of finishes including Polished, Honed,

Sandblasted, Flamed, Antique, Leather, and Bush Hammered, setting the benchmark for excellence in natural stone.

Mission & Vision

We curate nature's finest creations to elevate every space. Our mission is to be the most admired and ethically responsible brand in the industry. Looking ahead, we aim to lead the market through innovation, integrity, and inspiration - driving progress across the natural stone sector.

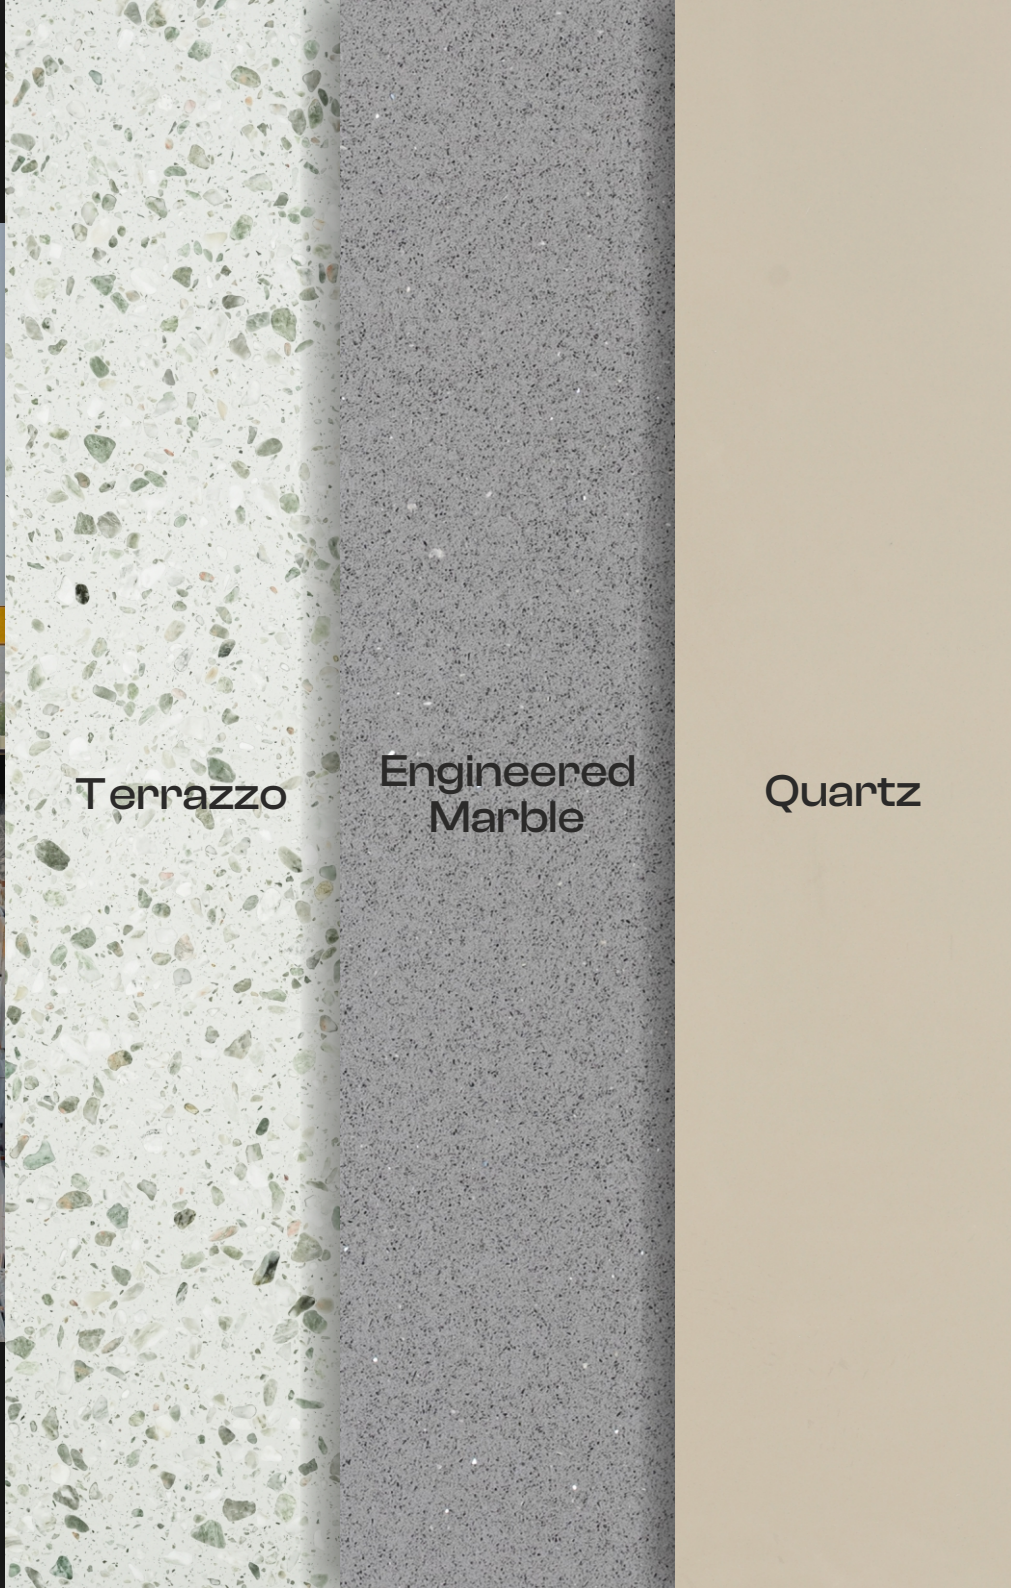

Global Sourcing, Local Expertise

Our sourcing network spans Italy, Turkey, Spain, Brazil, Greece, Portugal, India, Vietnam and China, allowing us to deliver world-class stone at competitive prices while meeting strict quality and delivery standards.

TERRAZZO

Introduction

Terrazzo is a timeless composite material made by embedding marble, quartz, granite, or glass chips in a cement or resin binder, then polishing the surface to a smooth, elegant finish. First developed centuries ago, terrazzo continues to be admired for its unique patterns, durability, and sustainable composition. Today, modern manufacturing has refined terrazzo into a high-performance surface ideal for both classic and contemporary designs.

Technology

Modern terrazzo production blends traditional craftsmanship with advanced technology. High-quality aggregates are mixed with polymer or cement binders, cast or poured into molds, cured, and then polished using precision machinery. This process ensures consistent color, texture, and performance, creating surfaces that combine design freedom with long-term strength and sustainability.

Engineered Marble

Introduction

Engineered Marble is a man-made surface crafted from natural marble aggregates, resins, and pigments. It offers the elegance of natural marble with enhanced durability and consistency. Its uniform appearance and wide color range make it ideal for both modern and classic interiors.

ENGINEERED MARBLE

Quartz

Introduction

Quartz is an engineered surface composed of natural quartz crystals blended with resins and pigments. It combines the beauty of stone with outstanding performance, making it one of the most durable and low-maintenance surfaces for modern design applications.

Technology

Manufactured through advanced vibro-compaction under vacuum technology, quartz surfaces achieve superior density and resilience. The blend of natural quartz grains with high-performance resins ensures exceptional durability, precise finish, and enduring aesthetics suitable for high-traffic and luxury environments.
